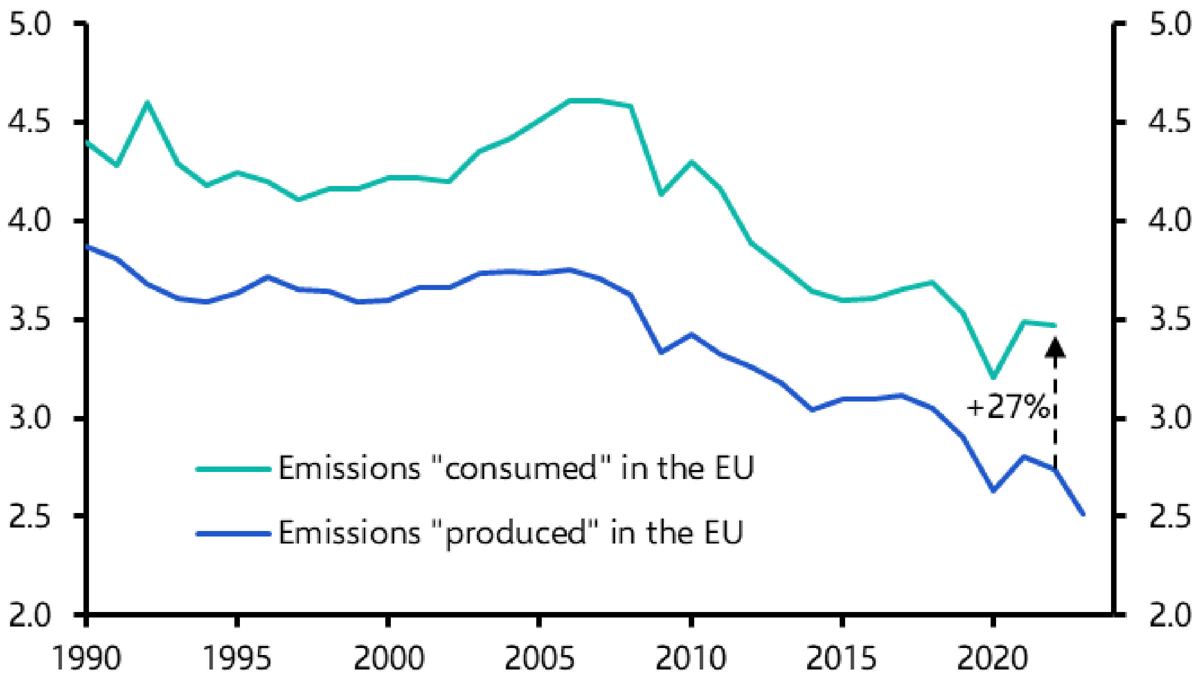
The Economic Impact of CBAM

The EU's Carbon Border Adjustment Mechanism (CBAM) is coming. Set to begin in 2026, it will require EU importers to pay for the carbon emitted in the production of goods they bring into the bloc – effectively extending the 'polluter pays' principle to imports. This series examines the implications of CBAM on the EU economy, exporters into the EU, and climate policy in general.

The Economic Impact of CBAM



CLIMATE ECONOMICS UPDATE

1. EU's CBAM takes carbon pricing global

The looming introduction of the EU's Carbon Border Adjustment Mechanism (CBAM) at the start of 2026 will finally extend the "polluter pays" principle to emissions imported into the bloc. This report –...

EUROPE ECONOMICS UPDATE

How much will ETS2 add to euro-zone inflation?

The introduction of the EU's Emissions Trading System 2 will add only a small amount to headline inflation in the euro-zone in 2027, perhaps just 0.1 percentage points. So ETS2 is unlikely to be...

CLIMATE ECONOMICS UPDATE

EU carbon market surplus keeps prices in check

The surplus in the EU carbon market dampened incentives to decarbonise in 2024, and the likelihood that the surplus is maintained until 2027 will keep a lid on carbon prices in the near term. Further...
